

COVID PREPAREDNESS ONSITE SAFETY EYEWEAR FITTINGS

Walman Optical Safety Eyewear will adhere to each company's COVID guidelines and policies.

PRIOR TO BEING FITTED WITH PRESCRIPTION SAFETY EYEWEAR DURING AN ONSITE SAFETY EYEWEAR FITTING, ALL COMPANY EMPLOYEES:

- Must not have a temperature or display any symptom(s) of illness.
- Must wear a face covering if they are NOT fully vaccinated.
- If the company allows, face coverings are optional for employees who are fully vaccinated.

TO ENSURE WE PROTECT YOUR EMPLOYEES DURING ONSITE SAFETY EYEWEAR FITTINGS, OUR COVID PRECAUTIONS CAN INCLUDE:

- Distancing behind a clear table shield while practicing safe, physical contact to properly fit each employee.
- Wearing a face covering over the mouth and nose.
- Maintaining a manageable frame selection to ensure frames are sanitized between fitting appointments.
- Sanitizing the safety frame after it's been tried on so it is clean before the next employee arrives for their fitting.
- Sanitizing the fitting area including the table, clear shield, frames and any other tools and equipment.

Walman will continue to follow COVID-19 protocols including: wearing masks for all employees, monitoring and reporting for signs/symptoms of COVID, completing contact tracing and following CDC recommendations, physical distancing where possible, and continuing proper handwashing, cleaning and disinfecting. Walman encourages all employees to receive a COVID vaccination.

COVID procedures will be updated as needed based on CDC guidelines.
